SC465X-8

60CM “Selection” Electric Multifunction Oven,
Antifingerprint St/steel
Energy Rating A

EAN13: 8017709130299

6 Functions

Big cavity

“Ever clean” enamel

4 cooking levels

1 Light

Full glass inner door

Removable internal glass for cleaning

Standard accessories:

1 Traditional tray

1 Rack

Nominal power: 3.0 kW

Grill power: 2.7 kW

Oven capacity: 60 litres

Functions

Versions

- **SC465N-8** - Black
- **SC465B-8** - White

Main Oven

Upper and lower element only:

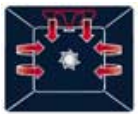
This method is known as "conventional" cooking, and is suitable for dishes that require a more gentle heat, such as baking. The oven needs to be pre-heated to the required temperature, and is best suited for single items, such as large cakes e.g. Christmas cake. Best results are obtained by placing food in the centre of the oven.

Grill element:

This allows rapid cooking and browning of foods. Best results can be obtained from using the top shelf for small items, the lower shelves for larger items, such as chops or sausages. Cooking using this method should be carried out with the door closed, unless instructed to do otherwise.

Fan with lower element:

This combination completes cooking more quickly of foods that are ready on the surface, but require more cooking inside, without further browning. Suitable for any type of food.



Fan with grill element:

Please note: cooking in this mode is conducted with the door closed. The fan reduces the fierce heat from the grill, providing an excellent method for grilling a range of foods, chops, steaks, sausages etc. without having to turn the food during cooking. This gives good results, reduces drying out of foods, and gives even browning and heat distribution, the top two shelves being recommended for use. The lower area of the cavity can also be used to keep other items warm at the same time. An excellent facility to use when cooking a grilled breakfast.

Fan with upper and lower elements:

The elements combined with the fan aim to provide more uniform heat. This is a similar method to conventional cooking, so pre-heat is required. This is not as effective as circulaire cooking but can also be used to cook biscuits and pastry.

ECO:

The Eco setting is a fast preheat function, which combines grill, fan and lower element to achieve optimum energy efficiency. Only to be used prior to selecting the main cook function for a fast preheat.
